

# GOLD MIRACLE

## STARTER, CLEANER & CONDITIONER FOR SILVER & LASER POLYESTER PLATES

**Gold Miracle** is best known for its ability to clean and condition silver paper and film based plates. You may not know that **Gold Miracle** does an excellent job of cleaning polyester laser plates such as Xante, Technova, Hurst Smartplate™ and Kimoto E2 plates. **Gold Miracle** removes light toner scatter, fingerprints, and helps eliminate toning, tinting, and scumming while sharpening fine lines and halftones.

**Directions:** Apply **Gold Miracle** with a cotton pad to the plate and rub lightly to remove light scratches, toning and scumming. If fine lines or halftones thicken or fill in, stop the press and clean with **Gold Miracle**. Wipe plate with cotton pad moistened with fountain solution after applying **Gold Miracle**.

\*Not recommended for electrostatic plates.

<u>FEATURES</u>	<u>BENEFITS</u>
